FINTECH PLATFORM BUILD & SUPPORT

BUILDING A FINTECH OR CROSS-BORDER PAYMENT PLATFORM?

The transfer screen is the easy part. The money movement system is the real product.

END-TO-END DELIVERY **EXPERT TEAM SUPPORT**

OR

Architecture, integrations, compliance controls, operations, reconciliation, security and scale.

BRAJKISHOR PANDEY FinTech & Payment Systems Architect

01 WHAT THE PLATFORM MUST CONTROL

A payment platform is more than APIs.

The real system connects money movement, compliance, operations and financial truth.

01

PAY-IN & PAYOUT

Cards, bank transfers, wallets, cash pickup and partner rails.

02

LEDGER & RECONCILIATION

Every money movement recorded, traceable and explainable.

03

KYC, KYB & COMPLIANCE

Onboarding, screening, limits, reviews and audit-ready evidence.

04

ROUTING & PARTNER APIs

Availability, retries, failover, cost and success-rate control.

05

ADMIN & OPERATIONS

Clear queues, exceptions, approvals, reports and partner portals.

06

SECURITY & DEVOPS

Monitoring, access control, deployment, resilience and safe scaling.

02 FROM IDEA TO PRODUCTION

I CAN BUILD IT END TO END.

C2C, B2C and B2B payment products designed around real operational needs.

01

ARCHITECTURE & MVP

Business flow, corridors, product scope, data model and secure system design.

02

CORE PLATFORM

Customer journey, beneficiary, quote, transaction, ledger and operations.

03

RAILS & CONTROLS

Pay-in, payout, partner APIs, KYC/KYB, fraud and reconciliation.

04

LAUNCH & SCALE

Production readiness, DevOps, monitoring, incident recovery and optimization.

03 SUPPORT FOR EXISTING TEAMS

ALREADY HAVE A TECH TEAM?

I can work alongside your developers and help where specialist FinTech experience matters most.

01 Architecture Review

Find gaps before they become expensive production problems.

02 Complex Integrations

Unblock partner APIs, gateways, banks, wallets and payout rails.

03 Production Recovery

Diagnose failures, performance bottlenecks and transaction issues.

04 Ledger & Reconciliation

Make balances, settlement and exceptions financially trustworthy.

05 Security & Scale

Strengthen access, monitoring, deployment and infrastructure resilience.

06 Engineering Guidance

Support delivery planning, code review and critical technical decisions.

04 EXPERIENCE THAT HAS MET PRODUCTION

BUILT AROUND REAL MONEY MOVEMENT.

Not theory. Experience across the architecture, delivery and operation of cross-border payment systems.

17+ YEARS

Software engineering and FinTech delivery

$1B+

Cross-border payment volume supported

50+

Payout company API integrations

C2C / B2C / B2B

Payment and remittance product models

THE OUTCOME

A platform that can move money securely, recover from failure and explain every transaction clearly.

LET'S DISCUSS YOUR REQUIREMENT

NEED A PLATFORM OR EXPERT SUPPORT?

Send me a LinkedIn message with the word

"PLATFORM"

Include these three details:

+ **Business model**
  C2C, B2C, B2B, wallet, gateway or another FinTech product.

+ **Target market or corridor**
  Where the money will be collected and where it will be paid out.

+ **Current stage or challenge**
  Idea, MVP, integration, production issue, modernization or scale.
